Risk Management and Insurance (RMI) programme has been developed in consultation with Monetary Authority of Singapore (MAS) and the insurance industry to strike a good balance between insurance, risk management theory and methods and their practical applications.

RMI graduates are risk professionals who are able to come up with an optimal risk management strategy to manage the risks of an entity, to underwrite the risks and to assess the validity of the claims.

Equips students with the necessary knowledge and skills to identify, assess, mitigate, monitor and report existing, and future enterprise risks faced by an organisation.
