Year 2, Double Degree in Accountancy and Business (Banking and Finance, International Trading Programme)

NBS equips its students with essential skills for the real working world. The career talks and networking sessions hone my interactive and social skills. I am now more confident in expressing myself especially when communicating with potential employers. Analytical and comprehensive skills are developed during classes. Through projects and extra-curricular activities, I develop leadership and teamwork skills which prepare me to work cohesively in my future job.

Debi Tng

BizAnalytics Club
Year 4, Double Degree in Accountancy and Business
USP Scholar

Opportunities are abundant – as long as you know how to look for them. I spent a semester as an exchange student at Cass Business School, participated in a global social entrepreneurial competition, a summer internship and even a humanitarian affairs conference. The key here is to actively look for these opportunities and grab them when they come. Do not expect and wait for things to happen to you. Make life happen for you.

Gordon Ong
President
Investment Interactive Club

PwC Whole Leadership Award

NBS is renowned for providing a conducive learning environment to facilitate our pursuit of knowledge. There are many facilities available to aid our learning, from the Free Access Labs to the Finance Trading Rooms that are equipped with Bloomberg terminals. In addition, I strongly urge all freshies to experience living in the Residence Halls at least once. On-campus living will expose you to more people, more extra-curricular activities and liven up your university life!

Brendan Sim
Vice-President
Tax Advisory Club
Year 2, Bachelor of Accountancy

NBS has created a fun and vibrant environment where students not only enrich themselves academically, but also get the opportunity to participate in a plethora of activities outside of studies by joining the many different clubs available. It has provided me with a well-rounded university experience and helped promote my personal growth.
As Nanyang Business School (NBS) continues to grow in esteem and excellence, becoming part of this legacy will be a wise strategic decision, optimising your academic journey with all that our faculty and facilities have to offer.

We are on a mission to educate global business leaders, and to advance knowledge in the theory and practice of management globally. Anchored by the four cornerstones of NBS’s curriculum—Learn, Grow, Lead and Serve—our programmes are designed to support NBS students in building skills, knowledge and experiences that tie back to the business world not just locally but globally.

NBS is a world-renowned institution, and our graduates are in high demand by corporations worldwide. Since 2009, NBS has been ranked among the world’s top 40 business schools. Our Accountancy graduates have topped the Singapore Qualification Programme (SQP) examinations, and one outstanding Banking and Finance undergraduate was even featured in Forbes’ 30 Under 30 Asia List in 2016.

The internationally diverse faculty has remarkable experience educating accountancy and business graduates. Continued collaboration between faculty and industry keeps our curriculum relevant. Our educators are top academics and committed in their areas of expertise. They are widely sought after as consultants by government agencies and listed companies. Many serve as board members of local and multinational companies.

NTU is a strong advocate of the blended learning approach. These courses provide a balance of online and face-to-face sessions. TEL is fast becoming an important academic tool to accelerate the student’s hands-on learning and enhance the retention of knowledge within a single pedagogical umbrella.

At NBS, we recognise that global experiences are essentials for success. We partner with external agencies and big industry players on big-impact projects that offer students out-of-classroom learning experiences. For example, the Cyber Risk Management (CyRiM) Project was launched as a collaboration with the Monetary Authority of Singapore (MAS) and financial institutions to facilitate research on cyber risk, security and insurance.

Being a global leader also means taking responsibility for the social, economic and environmental well-being of the community. Sustainability is key. Our courses cover ethics, leadership, communication skills and environmental responsibility, preparing students to build a sustainable business community.

We are part of NTU’s overall drive towards global excellence in education and research. Through our cultural intelligence courses, our students are well-prepared for cross-border student mobility programmes including student exchange, internships and internationally recognised competitions that simulate real-world business scenarios which strengthen their adaptability, creativity and intelligence in diverse and vibrant environments. Support and opportunities are limitless for students to develop, refine and reach their full potential at NBS.

We look forward to welcoming you to Nanyang Business School.
Develop New Capabilities to Transform Your Learning Journey

NBS believes that learning transcends the walls of classrooms. The school’s unique, well-tailored accountancy and business programmes equip students with both analytical and practical skills. NBS facilitates a unique experiential learning environment for students to acquire industry insights, skills and knowledge – the building blocks of career success.

EXPAND YOUR POTENTIAL
Unique and Challenging World-class Programmes

NBS provides a series of unique and challenging programmes led by top faculty. The school believes in honing students’ analytical and practical capabilities through experiential learning initiatives, in a diverse international environment.

1. Bachelor of Accountancy/Business and Master of Science (Financial Engineering)

NBS offers a four-year Bachelor’s-Master’s programme that combines the Bachelor’s degree in either accountancy or business, and the Master of Science (Financial Engineering). Under the programme, students undergo overseas study exposure at Carnegie Mellon University (CMU) in Pittsburgh, USA, where they are awarded a Certificate in Computational Finance upon successful course completion.

2. Double Degree in Accountancy & Business

This double degree programme, highly sought after by top students in Singapore, is designed to leverage the synergy between Accountancy and Business to provide students a balanced combination of business management know-how and accounting professional skills. Graduates receive two degrees at the end of the programme, which takes between three and half, and four years to complete.

3. Double Degree in Business (with Specialisation in Business Analytics) & Computer Engineering/Computer Science

These four-year programmes will build management skills and help students excel at data analytics, software application or computer engineering development. This programme equates the edge in the technology-driven business environment. Both programmes are offered jointly by NBS and the School of Computer Science and Engineering, NTU.

4. Bachelor in Accountancy

This programme creates discovery-based learning environments through seminar-style teaching to facilitate students’ active learning, with professors serving as facilitators and mentors. This approach, with its focus on critical thinking and problem-solving, equips students with analytical skills to handle unstructured, complex and strategic challenges in business. This radically new way of teaching accounting is the result of Project Discovery (PD), a partnership with the University of Illinois at Urbana-Champaign, which runs US’ top accounting programme.

5. Bachelor of Accountancy with Second Specialisation in Predictive & Forensic Analytics

The courses in the second specialisation complement the accountancy education that students receive in their Bachelor of Accountancy programme. Accountancy graduates trained in Predictive & Forensic Analytics will be able to help their organisations interpret data, maintain compliance and effectively shape/reshape their organisation’s strategic direction.

6. Bachelor of Accountancy/Business with Minor in Strategic Communication

Communication strategy is crucial to business success. The Minor in Strategic Communication offers a wide range of courses that complement business education, especially for the marketing specialisation. This includes courses in public relations, advertising and media planning. Students receive conceptual and practical training through communicating with a range of internal and external stakeholders. They also learn to implement communication strategy across various media platforms.

Zhang Ying
BBA 2018

The rigorous curriculum in BBS offers a myriad of modules, promoting multidisciplinary learning. Students get to experience plenty of project work and presentations where collaboration and communication are of paramount importance. I have also adopted the flipped classroom method which encourages self-learning and class time for exploring topics in greater depth. As a result, students are geared up into critical thinkers and effective communicators, both of which are traits highly sought after in the working world.

Loh Yuan Yi
BBA 2018

Banking and Finance Club
ATU Cross Country and Track and Field Athlete

The programme enables me to network with various external organisations in a professional level and gain a broader understanding of the corporate world. My involvement in Debate networking sessions has also enabled me to meet like-minded professionals who have gone beyond the classroom. I enjoyed being able to participate in competitions, both the Singapore and Asia-Pacific Debate Championship, and exchange my ideas with other like-minded individuals.

Amelia Nadia Ghazali Marican
Human Resource Consulting Club

While the NBS campus and hall facilities offer a conducive learning environment, the programme further enriches the BBA learning experience by creating a social space for students to grow socially, personally and professionally. The programme also taught me to look beyond my job scope and hone invaluable skills such as presentation, negotiation and developed better communication skills and leadership qualities.

7. Bachelor of Business

Guided by a pragmatic, real-world focus, the programme offers six cutting-edge and industry-relevant specialisations that are continuously updated through interactions and consultations with leading professional bodies such as the Certified Financial Analyst (CFA) Institute, the UK Institute of Actuaries, the Singapore Tourism Board, and the Singapore Computer Society. Team-based projects, presentations, simulations, and integrative case studies ensure that you will be ready to meet the demands of today’s complex and dynamic business world. Specialisation starts from second year of the programme, ensuring that students possess valuable substantive expertise that gives them an edge when they begin their careers.

7-1. Actuarial Science

The course is accredited by the Institute of Actuaries (UK), the only programme in Singapore to be accredited by one of the profession’s most respected bodies. On successful completion of this specialisation, students can qualify for up to eight exemptions for the Institute’s Core Technical Subjects examinations, which go towards their professional requirement to qualify as an actuary.

7-2. Banking & Finance

The programme is recognised as a CFA-Chartered Financial Analyst (CFA) programme partner, which will give students a head start in qualification for a CFA qualification. There are three tracks – Main track, Banking & Finance Platform-Based Learning (B&F PBL) and Banking & Finance International Trading Programme (B&F ITP). B&F PBL and B&F ITP are new tracks.

B&F PBL

The main goal of this track is to train graduates to be desk-ready in high-value-added sectors in financial services such as asset and wealth management, and capital markets. It aims to equip graduates with the right combination of knowledge and skills to perform tasks on the platforms consistent with those used in the industry.

B&F ITP

Singapore is the largest physical commodities trading hub in Asia and home to more than 400 global trading companies that have anchored their strategic global or regional functions here. With a building ecosystem of offshore trading desks and supporting industries, it is estimated that Singapore will need to grow the talent pool for the trading sector by approximately 500 persons per year to ensure a healthy pipeline of talent to fuel and sustain the continued growth of the sector. The International Trading Programme prepares students for lucrative careers in commodity trading.

7-3. Business Analytics

This course is the first to be offered by a Singapore business school— with the first graduates expected in 2017. It admits 60 students each year.

Big data and analytics has been identified by the Economic Development Board as an important growth sector for Singapore. By the end of 2017, data analytics is expected to contribute $1 billion to the economy, powered by 2,500 data analytics professionals.

The course focuses largely on business insights with particular sector for Singapore. By the end of 2017, data analytics is expected to contribute $1 billion to the economy, powered by 2,500 data analytics professionals.

The programme opens up client-facing career opportunities in management and technology consulting, consumer analytics and marketing sciences, risk management, and business forecasting in a diversity of industries including finance, hospitality, healthcare and retail.

7-4. Human Resource Consulting

A first of its kind in the Asia-Pacific region, the human resources specialisation equips students with key competencies to effectively manage human capital. The curriculum adopts internationally recognised and certified HRC tools to give students a solid grounding in human resource practices. Students also develop interpersonal skills for networking and managing in a culturally diverse work environment.

7-5. Marketing

This course prepares students for an exciting career in a variety of marketing functions that may include brand and product management, key account management, trade marketing, advertising, and market research. It gives them a strong grounding in market analysis, planning and decision-making techniques, as well as consumer and business behaviour theories relevant to modern marketing practice. The curriculum places a strong emphasis on experiential methodologies, and students can expect to learn through business cases, computerised simulations, field trips, consumer experiments, online tools and various team projects.

7-6. Risk Management and Insurance Programme

Today’s society faces major challenges such as global warming, ageing, catastrophic risks and emerging threats such as cyber-attacks. They have been increasing in magnitude and complexity. To properly execute their job functions, risk managers and insurers need to develop innovative solutions and tools. They need to enhance corporate and personal risk management.

In the programme, several insurance courses are intended to cover topics that correspond to the Chartered Insurance Institute (CII) units. Successful completion of those courses prepares students for corresponding CII examinations.

Immerse in a World of Opportunities to Optimise Your Potential and Propel Growth

Unlock your full potential in a life-changing journey with NBS, whose development plans for its students extend beyond class curriculum. There will be bountiful opportunities to grow through interactions during cross-cultural exchanges, global immersion programmes, competitions and student clubs. Strong bonds forged over such experiences string together future business networks and enrich life after graduation.
ENGAGE AND NETWORK AROUND THE WORLD

Testimonials of NBS Students’ Overseas Work Opportunities

Despite the competitive job market, NBS graduates have been placed in premier companies for both internships and permanent roles locally and abroad. NBS Career Services offers a plethora of courses, workshops and seminars such as mentoring programmes (industry, corporate and alumni mentoring), CareerFIT and Learn-Over-Lunch (LOL) to ensure graduates are real world ready.

One Step Ahead with NBS Career Services

NBS’ team of career managers is dedicated to the development of students’ career paths. NBS supports students to define career goals and map out paths to achieve them. Through courses, workshops and seminars, NBS Career Services help work out the careers that best fit students’ skills, interests and values. Graduates are equipped with knowledge to help nail that dream job interview.

7th Annual NBS Career Day

The 2016 Annual NBS Career Day was the biggest one in NBS history. There were 1,400 attendees and close to 50 choice employers offering more than 1,000 internships and job opportunities.

In her speech, Guest of Honour, Ms Low Yen Ling, Parliamentary Secretary, Ministry of Education and Ministry of Trade and Industry and Mayor, South West CDC, highlighted the importance of combining academic results, classroom knowledge and experiential learning to nurture the next generation of skills-ready professionals.

This year, pre-university students were invited to an exclusive opportunity to participate in DiscoverU – a platform for students to meet with industry experts.

With premier employer partners from a variety of industries including fast-moving consumer goods (FMCGs), banking, finance, healthcare, hospitality, management consulting, oil and gas, pharmaceuticals, real-estate, retail, technology, telecommunications, tourism and more, NBS students were presented with many opportunities for a promising start to their careers.

7 in 10 NTU Graduates Secured Jobs Before Graduation: Survey

Seven in 10 students from NTU’s graduating class of 2016 secured jobs before graduation, according to a preliminary survey of more than 5,000 graduates conducted by the university in June.

Global Opportunities, Broadening Horizons

Education should not be constrained by geography. NBS’ exchange partnerships with esteemed universities around the world such as Tsinghua University in China, University of Illinois at Urbana Champaign in the U.S., York University in Canada, University of Mannheim in Germany, University of Edinburgh in United Kingdom, ESSEC Business School in France, University of St Gallen in Switzerland, and the University of New South Wales in Australia, offer opportunities for semester-long overseas immersions that broaden global network and perspectives.

Unique Internship Destination in Ethiopia

Ng Jun Hao and Teo Joo Hou first heard about interning in Africa’s fastest growing economy through NBS CareerFIT. After much discussion with NBS Career Services, they decided to send in their applications and were selected for a 10-week internship at Wilmar International’s Ethiopian office.

We were primarily based in the Finance Department, while also gaining exposure to other functions of the business. On some days, we conducted market visits all over Ethiopia to understand how company strategies were aligned with consumer preferences. On other days, we provided recommendations for improvements to business operations and processes.

The learning curve was steep but priceless! Both of us have gained a fair understanding of running a huge corporation with large global footprint, while witnessing the agility and responsiveness required of a business that serves the needs of local consumers.

Overseas Entrepreneurship Programme (OEP)

The Overseas Entrepreneurship Programme (OEP) offers entrepreneurially inclined students a one-year internship experience in some of the most vibrant start-up ecosystems around the world. Mentored by founders, students will experience the travails of starting up a business while picking up invaluable life skills in leadership, adaptability and cultural understanding. Depending on the location, students can also take up courses at partner universities.

To experience the start-up scene in the bustling city of London is a dream come true. I am inspired by the many aspiring entrepreneurs who work their ideas to traction and the sheer determination of many who are part of a thriving start-up ecosystem. It is also a fun challenge to be relocated in an entirely new environment, which makes the “overseas” element of the programme all the more valuable.

My work in building up a finance reporting system for a London start-up, has been very fulfilling. Through networking sessions, we are able to exchange ideas with aspiring entrepreneurs. Joining OEP has been one of the best decisions made in University and I have seen much growth since coming on-board.

Take the path less travelled. Be bold; be the change you want the world to see. NBS is home to some of the world’s most outstanding thought leaders. The school’s conducive environment encourages like-minded undergraduates to participate actively in local and global competitions, summits and leadership development programmes. This inspires bright young minds to step up as the next generation of business and public leaders.
GROOMING GLOBAL LEADERS OF TOMORROW

World-renowned Faculty Meet Bright Young Minds

NBS’ world-class educators are professionals in their specialised fields, highly sought-after and recognised for their expertise. Under their mentorship, students of NBS will reach their fullest academic potential.

First Place in the McGraw-Hill Education Excellence Award 2015

Dr. Michelle Phang Mee Seing, Senior Lecturer of Accounting at NBS, was presented the McGraw-Hill Education Excellence Award in 2015. The award recognised prominent lecturers and professors across Asia Pacific for their excellent usage of technology to enhance students’ educational experience.

Shaping Singapore Infocomm Industry

Associate Professor Damien Joseph of Information Technology and Operations Management was conferred a Fellowship by the Singapore Computer Society (SCS) on 24 March 2016. The SCS is Singapore’s largest professional association of the infocomm industry. He is recognised for his contributions to the field of information technology and plays a pivotal role in advancing the infocomm industry in Singapore.

Among Asia’s Top 50 Women Leaders

Associate Professor Gemma Calvert of Marketing and International Business was among Asia’s top 50 women leaders to bag the Leadership Excellence citation in 2016.

Let Us Fixir It!

Even before co-founders Glenn Ong, Ryan Chew and Hiroshi Chee have completed their studies, they are three business partners in a new start-up, Fixir (www.fixir.co), a platform that connects car owners with reliable workshops for repair and maintenance through their website and iOS mobile app. The team first registered for Nanyang Technopreneurship Centre’s ideascorn competition—a start-up accelerator programme. They made it into the finals. The Fixir website was launched in August 2015. Three months later, the team launched a beta iOS app.

Starting a business from scratch is not an easy task, but the team is confident that their education has prepared them well. Glenn says, “I was privileged to have learned the basics of entrepreneurship from the Minor in Entrepreneurship programme conducted by Nanyang Technopreneurship Centre, and my knowledge was further complemented by finance and accounting courses I took at NBS. I felt ready to manage the operations and finances of Fixir.”

Abbass: Sharp Mind, Gold Heart

In February 2016, Mohamed Abbass, Year 3, Bachelor of Business (Banking and Finance), was selected as a finalist under the Finance and Venture Capital category of the inaugural Forbes’ 30 Under 30 Asia List. He is among 300 top-promising young entrepreneurs and leaders, each recognised for “contributing to their industries in a significant way”.

Five undergraduates, a real-world asset management scenario and two tough-as-nails teams from Hong Kong and Taiwan—that’s what it came down to at the J. P. Morgan Asset Management Challenge 2016. After beating six teams locally and two more at the regional level, team NBS aka Lee Capital Partners clinched the Asia Pacific Regional Champions title in Hong Kong on 22 April 2016!

Wilson Soh Suh Ming Jun (Year 3), Felicia Quek Wen Qin (Year 3), Alexandra Lou Xing Ying (Year 3), Chua Jie Xuan (Year 2) and Isabelle Tan Li Hui (Year 3) are part of the Centre for Applied Financial Education’s (CAFE) Platform-Based Learning Track taught by Associate Professor of Banking and Finance, Lee Boon Kang.

When asked about the best advice for aspiring competitors, the team emphasised on perseverance, practice and mutual learning. So what does it really take to win? Their response: “Trust your team, believe in each other and be confident. Be receptive and always seek alternate perspectives. At the end of the day, having a balanced team is as important as managing a balanced portfolio.”

NBS Undergrads Aim to Transform Africa’s Food Scene

NBS won the top prize in the recently-concluded Africa Business Model and Business Plan Competition 2016. Organised by NTU-SBF Centre for African Studies, the grand finals were competed by 10 teams from across NTU, NUS and SMU.

Three students — Tay Woon Yeow, Ng Jun Jie and Fong Kai Yin from the Double Degree in Accountancy and Business — have done our school proud by sealing the championship title in the grand finals.

The fitting prize was a paid-trip to an African nation of their choice where they will visit actual startups and meet with entrepreneurs.

The Winning Portfolio: Team NBS Bags It!

Assistant Professor Krishna Savani of Strategy, Management, and Organisation received the inaugural 2015 Rising Star Award from the Association for Psychological Science (APS). Recently, he was also awarded the 2016 Nanyang Assistant Professorship (NAP) by the University, presented to outstanding young researchers and exceptional scholars in the fields of science, engineering, social sciences, arts and humanities or business.

Let Us Fixir It!

Associate Professor Gemma Calvert of Marketing and International Business was among Asia’s top 50 women leaders to bag the Leadership Excellence citation in 2016.
Go Beyond Business to Create Positive Impact Around the World

Being a global leader is more than just delivering financial returns. Strong, true leaders set out to make a difference and create value for the society. NBS' service learning activities enhance students' capability for integrative thinking and improve the triple bottom line. Develop your business acumen into useful skills for helping others. Add depth and diversity to your career path and life journey.
TOGETHER WE CAN
MAKE A DIFFERENCE

Touching Hearts and Changing Lives for a Better Tomorrow

Corporate social responsibility and sustainability are more than just green practices. They positively impact employees and the communities in which we operate. NBS recognises the importance of giving back to society. Students can apply their academic knowledge and skills to real world challenges while bringing positive changes to the society.

NBS Alumni Appointed to NTU Board of Trustees
NBS alumni Lim Chow Kiat and Tan Chin Hwee have been appointed to the Board of Trustees of NTU on 1 April 2015. The NTU Board of Trustees, established as a key pillar of university governance, comprises 18 members and is chaired by Mr Koh Boon Hwee, who is currently Chairman of private equity firm Credence Partners.

Mr Lim Chow Kiat graduated with a First Class Honours Degree in Accounting and Finance from NTU. Since joining GIC, Singapore’s sovereign wealth fund, in 1993 as a portfolio manager and GIC’s only fresh hire that year, Mr Lim has risen steadily through the ranks and has recently been promoted to Chief Executive Officer of GIC in January 2017.

During his professional career, Mr Lim has clinched several accolades. In 2012, he became the youngest inductee of the Fixed Income Analysts Society Hall of Fame, in recognition of his contributions to the advancement of fixed-income analysis and portfolio management.

He received NTU’s Nanyang Alumni Achievement Award in 2013, in honour of the key leadership role that he has played in safeguarding and enhancing Singapore’s financial future during his career in GIC.

Mr Tan Chin Hwee, who graduated from NTU with a Bachelor of Accountancy Honours Degree in 1995, is the Chief Executive Officer in Asia-Pacific for Trilgamma Group, among the largest firms globally; it is now headquartered in Singapore. Before Trilgamma, Mr Tan was the founding Asia partner for Apollo Global Management; he was voted by The Hedge Fund Journal as the emerging top 40 absolute return investors globally and named the Best Asia Credit Hedge Fund Manager by Horing Kong-based publication The Asset.

Presently Mr Tan is also a Director of Singapore Press Holdings, Keppel REIT, Lien AID and KIC Hospital Endowment Fund.

After winning the 2013 Distinguished Financial Industry Certified Professional Award from the Singapore Government, Mr Tan was presented with the Nanyang Alumni Achievement Award in 2014; he was also honoured as a World Economic Forum Young Global Leader and a World Cities Summit Young Leader. He is also a proud recipient of the World Outstanding Young Chinese Entrepreneurs Award in 2015.

Mr Tan is on the advisory panels for Monetary Authority of Singapore and Maritime and Port Authority of Singapore (MPA) and most recently, he has taken on the International Olympic Council Independent Advisor role. He is an adjunct professor at Nanyang Business School and is the co-author of Asian Financial Statement Analysis: Detecting Financial Irregularities.

Empowering Women in India
Andrew Yin, Double Degree in Accountancy and Business, Class of 2016, took a year off from his studies to do humanitarian work in India in 2014. In recognition of his remarkable contribution to the community, he was presented with the Nanyang Award (Humanitarian Work) in 2014. During his internship at World Toilet Organisation, he was most affected that three out of 10 girls drop out of school upon puberty because of their menstruation. Andrew took a leap of faith to help these women. His idea was simple: invent a sanitary pad which is affordable and effective. His bigger plan was to make use of an aquatic weed indigenous to rural India, water hyacinth, to create the product.

He collaborated with an organisation in India to set his idea in motion in March 2014. Through their unique idea, women are now employed to make and sell these sanitary pads to their own community, serving as an additional source of household income. Today, approximately 100 women are employed, potentially reaching out to 300,000 other women. Girls are now using sanitary pads so they could continue attending classes during their menstrual periods.

Andrew’s team clinched the Top 10 social enterprises at the prestigious 5 Minutes To Change The World competition organised by United Nations Women. He continues to raise funds for his cause worldwide.

A Slice of Sichuan Life
The NBS Sichuan Teaching Project is an annual service-learning collaboration with Shuangdong-Nanyang Primary School in Deyang, Sichuan Province in China. The project was founded since NBS first received financial donations from the EMBA China alumni to rebuild the school in the aftermath of 2008 Sichuan Earthquake.

This year, 22 NBS students worked hard towards the goal of a three-week teaching trip in June. They not only worked towards betterment in society, but also forged closer friendships with teammates, while making fond memories with the children.

Georgina Ng
Marketing Manager, Tourism and Hospitality Management Club Head of Business, Tourism and Hospitality Management

Life in NBS has been challenging because the transition from a polyclinic to a university was unexpectedly huge. I found it very difficult to cope initially, as the rigor of a university education proved to be daunting. Thankfully, I became surrounded by many friends, who extended a helping hand to help me in my studies. Through my life in NBS, I learnt that failure is not final, if we pick ourselves up and try again.

I became acquainted with many friends, who extended a helping hand to

Heng Yi Wen
President, Quantitative Finance and Actuarial Science Club Year 3, Bachelor of Business (Actuarial Science)

I joined the Henderson Inn Faith Goodwill Shoe Project which is founded by an NBS alumnus and supported by NBS Undergraduate Programme Office. The Project involves a monthly food and snack distribution to the low-income families residing in the rental flats at the Henderson district. Through this Project, I am able to ease the financial strain of these families. I also have the opportunity to interact with these underprivileged residents, understanding their needs and struggles.
NBS PROGRAMMES

Bachelor of Accounting/Business and Master of Science in Financial Engineering (MFE)

NBS offers a special programme that combines two very popular programmes — single degree Bachelor of Business and MFE. This academic option is introduced as a way of encouraging NBS students in Singapore, is designed to leverage the synergy enabling them to go beyond the usual undergraduate education and develop more advanced knowledge and insights in Finance; at the end of the programme, which takes between three and four years to complete.

Bachelor of Accounting/Business and Master of Science in Financial Engineering

In recent years, there has been an increase in the demand for finance graduates, especially in the rapidly growing financial markets of Asia and Europe. This gives graduates the opportunity to develop more advanced knowledge and insights in finance; at the end of the programme, which takes between three and four years to complete.

Both programmes are offered jointly by NBS and the School of Computer Science and Engineering, NTU.

Bachelor of Accounting with Second Specialisation in Predictive & Forensic Analytics

Bachelor of Accounting with Second Specialisation to Predictive & Forensic Analytics

In recent years, there has been an increase in the demand for finance graduates, especially in the rapidly growing financial markets of Asia and Europe. This gives graduates the opportunity to develop more advanced knowledge and insights in finance; at the end of the programme, which takes between three and four years to complete.

Bachelor of Accounting/Business and Master in Strategic Communication

Bachelor of Accounting/Business with Minor in Strategic Communication

This Minor in Strategic Communication offers a wide range of courses that complement business education, especially in public relations, advertising and marketing. Students also have the choice to undertake one out of six industry-specific specialisations.

Visit the undergraduate tab at www.nbs.ntu.edu.sg for details on our programmes.
