

Position: Information Systems Manager
Company: Accountant-General's Department
Location: Singapore

Company Summary

The Accountant-General's Department (AGD) is responsible for the accounting and finances of the Singapore Government. Its work is wide ranging and includes financial and management reporting, managing and reporting on Singapore's reserves, investments and properties, cash management, setting accounting standards and policies, administering and reviewing accounting and financial policies, and reviewing Government expenditures for value-for-money. Successful candidates may either work in AGD HQ or be part of the management team at the ministries.

Job Responsibilities

The Information Systems Manager is responsible for the development and implementation of a comprehensive IT strategy in line with AGD's short- / mid- / long-term business objectives. He / She will manage all IT vendors, including application maintenance, facility management and data centre services vendors, develop and implement the IT security policies and measures for AGD and build up in-house IT capabilities on all AGD applications, especially the central financial, payroll and pensions systems. He/she will also manage and coordinate IT projects / initiatives and introduce the best practices in IT in AGD.

Job Requirements

- Bachelor Degree in Business IT from a recognized University
- Minimum 7 years of experience in project management
- Knowledge of ERP software on accounting, payroll and finance will be an added advantage
- Strong analytical mind
- Excellent team player
- Good written, communication and negotiation skills
- Be versatile
- Keen interest in public sector policies
- Passionate in shaping public policies
