

## **Nanyang MBA Alumni Association**

### **Honorary Auditor for Term 2009-2010**

**Mr Sudhanshu Malani**  
**Full-Time MBA Participant**

Sanju is a full-time participant at the Nanyang MBA Programme (specializing in Finance and Strategy). As a graduate from the Kelley School of Business (Indiana University, U.S.A.) in Accounting, Finance and International Studies, he has worked for 4 years in public accounting (most recently at Ernst & Young in the U.S.). He has worked with both privately held companies as well as Fortune 30 companies in the U.S. on audit and various attestation engagements. As a Senior Auditor at Ernst & Young (and Katz, Sapper & Miller prior to that), he has significant experience in managing teams and interacting with top client executives regularly.

Sanju is also presently involved in the Nanyang MBA Student Executive Committee (Ex-Co) that creates cultural awareness by hosting various social events as well as focuses on networking with companies for the benefit of its student body. With experience in a leadership role in similar organizations in the U.S., he has developed a network which will further help serve the students via the Ex-Co. A solid accounting background and prior involvement with organizations from an auditor's perspective makes him an appropriate fit for the position of an Honorary Auditor to the Nanyang MBA Alumni Association.

In addition to Sanju's detail-oriented accounting background, a necessary strength when leading an organization of this size, he is also a Certified Public Accountant (CPA) and a Certified Fraud Examiner (CFE) by profession. These qualifications positively influence recruiters when they are invited to represent their company by leaders of the organization. With significant exposure to top management and executives in various companies, he continues to develop the necessary people skills and networks needed to effectively serve the student body at NTU. With significant exposure to global and local companies and prior work and academic experience in multi-cultural environments (in the U.S.), he hopes to enrich the students' experience during their time at NTU.
